

Code Name Game Instructions:

I have attached a blank template if you are up the challenge of making your own words. This could be handwritten or typed into and the printed off.

I was thinking you could do a full new Testament version to get more words in (the more words the better, but people, places or things work best in my opinion)

I have done up 75 words which I have typed in, so all you would have to do is print this version, cut them out and you will be ready to start!

You will need your own covers - 8 red, 8 blue (colour doesn't matter) and 1 card that can be either (half and half). These are for covering your clue cards once they have guessed correctly.

The excel spreadsheet is the game cards for the guesses. Remember you can turn those cards to get a new game every time. We just alternate who goes first, but there should be a coloured border on them, and you can use that to decide who goes first if you want.

I have included the full rules at this link. <https://howdoyouplayit.com/codename-rules-howdo-you-play-the-codename-board-game/>

I have also included a short you tube video that explains how the game is played:
<https://www.youtube.com/watch?v=J8RWBooJvg>

Optional or EXTRA FUN:

Family / Little Siblings version - instead of teams, work together to complete the board without guessing the black square.

Picture version - make a picture of each word on the back of the playing card, give clues with using just the picture, I think it would be much harder.

Zoom with another family or families - take a picture of the board set up and share screen and then let the guessing begin!

Have Fun with this everyone!

Much Love Aunty Jenn Cabral.
